Prerequisite: PHYS 1600, Engineering Physics I

Instructor: Dr. Peter Schwartz
101 Textile Building
844-5452
schwartz@eng.auburn.edu
Office hours: M-F 9:00-10:00, others by appointment
Web: [http://schwartz.eng.auburn.edu/2100/ENGR2100.pdf](http://schwartz.eng.auburn.edu/2100/ENGR2100.pdf)

Attendance: Attendance is not required, but is strongly urged. I tend to give the benefit of the doubt on borderline grades to people whom I recognize, and if you don’t attend the probability that I will recognize you is not very good (Ref: STAT 3010).

Quizzes: There will not be any examinations nor will there be a comprehensive final examination. Your entire grade will be determined by your performance on a total of 13 in-class quizzes. Quizzes will be given on Wednesdays according to the class schedule. Up to three (3) of your lowest quiz scores can be replaced by taking make-up quizzes given during the assigned final exam period. Make-up quizzes during the semester will not be given. If you miss a quiz, for whatever reason, the missed quiz can be made up during the final exam, and will be counted as one of your quiz scores.

Homework: You are expected to know how to solve the six (6) problems at the end of each lesson. Homework will NOT be collected or graded, but will be the basis for all in-class quizzes given during the semester.

Academic Integrity: The highest standards of academic integrity are expected. Consult the Tiger Cub, or speak to me if there are any questions.

Grading Policy: The following scale will be used to determine the minimum grade:

- A: 90-100%
- B: 80-89%
- C: 70-79%
- D: 60-69%
- F: < 60%
